

# Teskey Hillside Connector

## TESKEY TO JINKERSON

### PROJECT PURPOSE

The new road will be known as Ross Road and is needed to accommodate growth and traffic in the area. Jinkerson Road has had much higher traffic volumes than it was meant to manage. As the community continues to grow, the new Ross Road will support future development.

### WHAT IS THE HISTORY

This future road connection was identified in the 1989 Promontory Area Comprehensive Development Plan and in the 2000 and 2016 Promontory Area Road Network Studies and Chilliwack's Official Community Plan for more than 30 years.

### WORK DETAILS

#### Timeline

**November 2020 - September 2021**

- single-lane roundabout
- approximately 250m of new road construction including:
  - storm main relocation
  - drainage works
  - streetlighting
  - trail connections (*between Jinkerson Park and Teskey Way*)
  - sidewalk
  - bike lanes

#### Jinkerson Park

The road will be constructed just north of Jinkerson Park and south of the Eagle View Ridge townhouse complex within the designated road right-of-way. Park amenities such as the hockey box and parking lot will remain in their current location.

### CHANGES

#### Congestion

- this new connection to Teskey Way will reduce travel time for residents on the east side of Promontory and will reduce traffic volumes at the intersection of Teskey Way and Jinkerson/Hudson Road.
- the traffic volumes have created safety concerns and excessive delays, and traffic analysis shows that a traffic signal will not solve the problem.

#### Trails

- during road construction (Nov. 2020-Sept. 2021) the Teskey Way Trail will be closed. Consider taking the Rexford-Bailey Trail as a detour to access the bottom of the Jinkerson Stairs. Please see attached map.

#### Ross Road @ Jinkerson Intersection

- new crosswalk installation including a Rapid Rectangular Flashing Beacon (RRFB-flashing crosswalk).
